# How to Install Digital Forensics Framework in System

June 6, 2015   By Raj Chandel

DFF (Digital Forensics Framework) is a free and Open Source computer forensics software built on top of a dedicated Application Programming Interface (API).
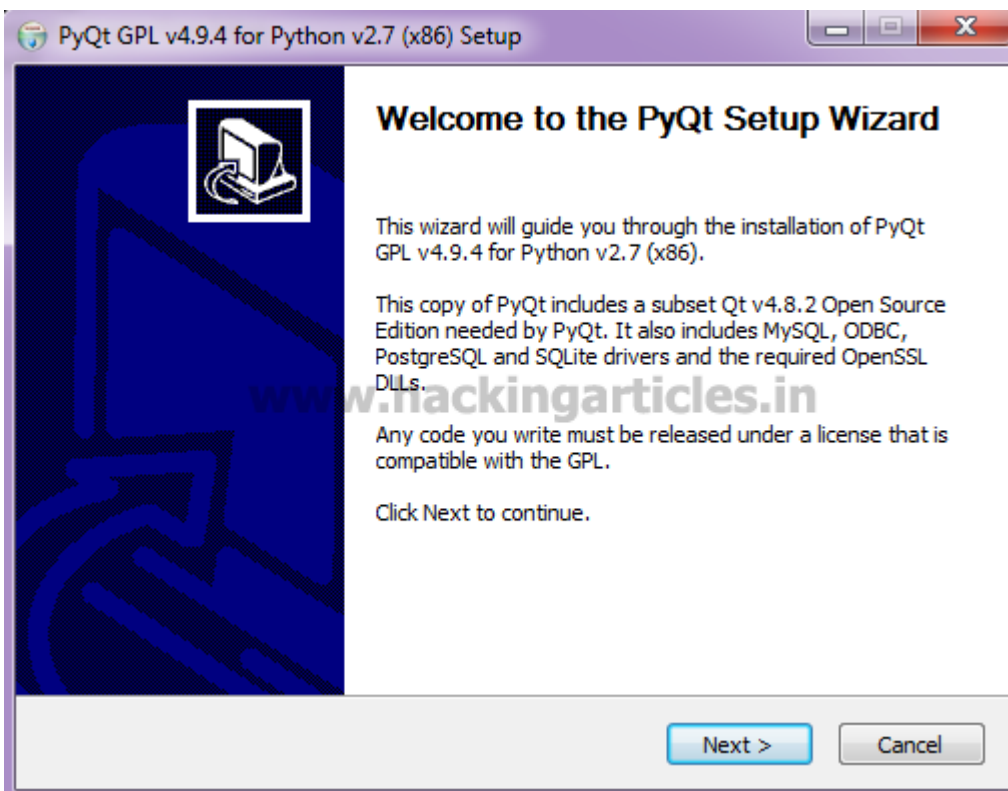

It can be used both by professional and non-expert people in order to quickly and easily collect, preserve and reveal digital evidences without compromising systems and data.

To install DFF (Digital Forensics Framework), firstly install python from link given below
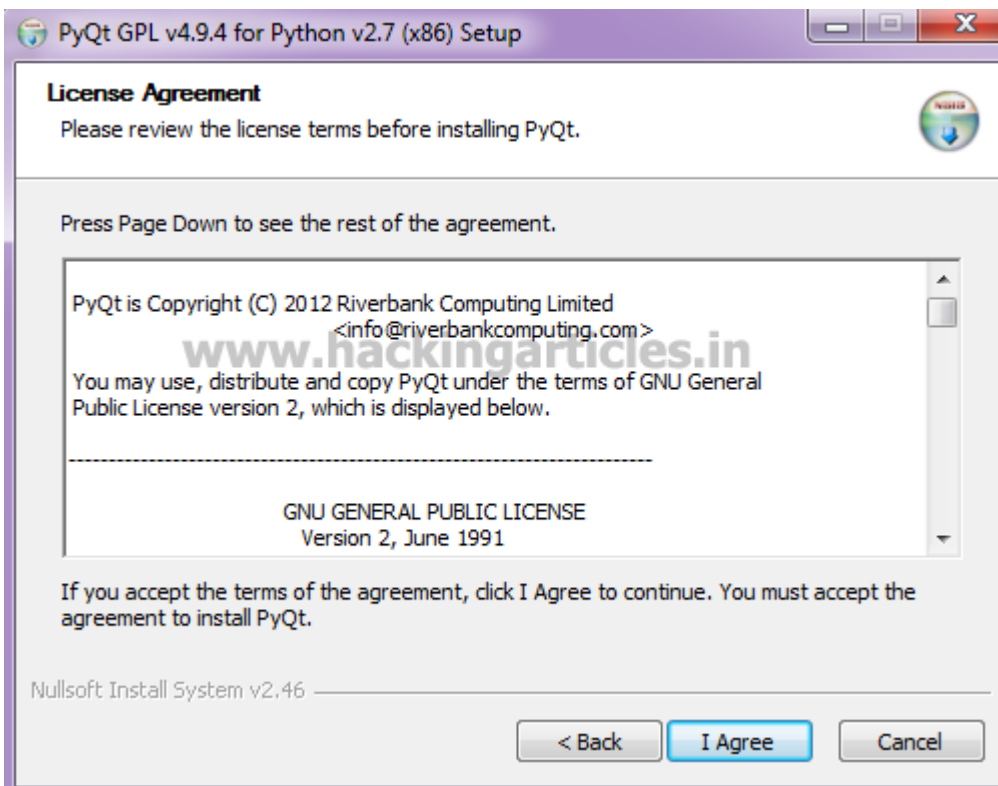

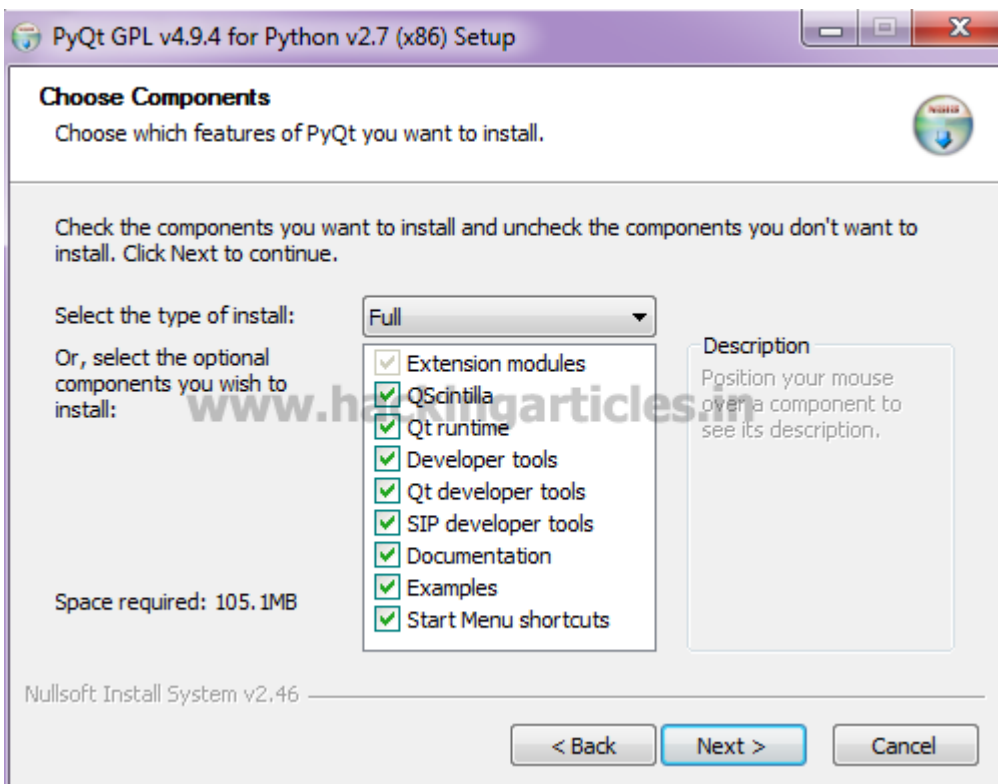

Python from **Here.**

Install PyQt4 from Here These both are prerequisite for DFF.

Now click on I Agree Option

PyQt GPL v4.9.4 for Python v2.7 (x86) Setup

License Agreement
Please review the license terms before installing PyQt.

Press Page Down to see the rest of the agreement.

PyQt is Copyright (C) 2012 Riverbank Computing Limited
